SUMMARY

As a former biology and physics teacher; I'm interested in the intersection of education, technology, and any experience that meshes the digital with the real. I love solving mind-warping code problems with minimalist code and a nice hot cup of tea.

EXPERIENCE

Software Engineer   AUG - DEC 2015
General Assembly/Verb/Accordian Health

- Worked on projects for Verb and Accordian Health. Work included back-end data transformation and front-end responsive design.
- Worked individually and on teams to share repo's over Github and deployed with Heroku and AWS
- Used the MEAN stack and Rails/Active Record for apps with database experience ranging from PostgreSQL to Mongo DB

I used to be a chemistry/physics teacher in California. I worked with high school children of migrant workers in the central valley

PROJECTS

Doctor Location App
http://serene-coast-7290.herokuapp.com

- App for medical insurance providers to see location and number of medical practitioners around any zipcode in the world.
- Node, MongoDB, Javascript, Express, JQuery, Bootstrap, Leaflet, Mapbox

GAJobsATX
http://www.gajobsatx.com

- Real-time job posting app, for GA students and staff to use to post potential employers
- Angular, Bootstrap, MongoDB, Node, Express

RecordKeeper
https://powerful-taiga-9352.herokuapp.com

- Vinyl record storage and trading app
- Ruby, Ruby on Rails, JQuery, PostgreSQL, Bootstrap

AsteroidDefender
https://www.linkedin.com/pulse/new-c-game-adam-weitzman?trk=prof-post

- Unity/C# retro top-down style arcade shooter.
- C#, Javascript, Unity, Gears

Other Projects
- BarTinder - http://bartinder-dev.elasticbeanstalk.com/login
- Lowes Hackathon (Lowes Buddy) – coming soon...
