@hackturalist

As a former biology and physics teacher; I'm interested in the intersection of education, technology, and any experience that meshes the digital with the real. I love solving mind-warping code problems with minimalist code and a nice hot cup of tea.

Experiences

May 2016 – Present
C#/Front-End Developer - Jackrabbit

- Built Ruby On Rails app with Angular client

- Configured .NET gateway app for MS SDK

- Grid FE with Angular Material and Bootstrap

Nov 2015 - May 2016
.NET/SQL Developer - Tripchamp

- Back-end data transformation and serializtion/deserialization in C#

- Used AJAX and NUnit testing along with classic OOP programming

- Set-up custom Load Balancer in AWS to scale project from small-startup to multinational company (India, England) C#.NET MVC App with custom normalization code to map API agents
